Profile

Senior software engineer with 10+ years of experience designing and building scalable web platforms across frontend, backend, and infrastructure. Specialized in frontend platform architecture, with expertise in micro-frontends, server-side rendering, observability, and large-scale modernization. Combines strong technical judgment with a product and design background to turn ambiguous requirements into reliable, maintainable solutions that help teams deliver independently.

Experience

Mercado Libre — Senior Software Engineer 2021–Present
Bogotá, Colombia

- Designed and implemented Module Federation for Fury, Mercado Libre's internal application platform, distributing ownership across 50+ teams and 150+ micro-frontends.
- Built the server-side-rendered Shell host that orchestrates the site's shared layout and uses configuration-driven routing to compose independently owned micro-frontends into each view.
- Implemented monitoring and observability capabilities for the federated frontend ecosystem, providing operational visibility across independently deployed applications.
- Contributed to several platform-wide migrations across Fury applications as Mercado Libre's internal design system evolved, coordinating changes across dependent applications and teams.

Quantum Connexion — Software Engineer 2019–2020
Bogotá, Colombia

- Administered and maintained IBM Watson Assistant, designing chatbot flows exposed through REST services to PHP and Node.js applications.
- Built integrations backed by MongoDB and delivered reactive interfaces with Vue.js.

Tradeview / iLikeWebSites — Web Developer & Designer 2016–2019
Bogotá, Colombia

- Developed and maintained administrative and customer-facing web applications using PHP, MySQL, and MVC architecture.
- Managed Ubuntu and CentOS web servers and integrated payment gateways and trading platforms, including PayPal, Skrill, Neteller, AlliedWallet, MT4, MT5, and cTrader.

Rampa / Data Solutions Group — Web Designer 2015–2016
Bogotá, Colombia

- Created WordPress templates and administered websites built with WordPress and Joomla.

Skills

Programming: TypeScript, JavaScript, PHP, SQL | **Frontend:** React, Vue.js, Module Federation, micro-frontends, SSR
Architecture & Platform: monorepos, frontend platform architecture, observability, monitoring, design systems, large-scale migrations
Backend & Data: Node.js, REST APIs, MySQL, MongoDB, Linux, Git

Education & Credentials

Escuela de Artes y Letras Institución Universitaria — Graphic Design coursework (Web emphasis) 2013–2016
Misión TIC 2022, Universidad Nacional de Colombia — Programming skills and web application development 2021

Languages

Spanish — Native | English — Professional working proficiency
